RUDY MARTINEZ
1221 BRUCE RANDOLPH AVE
DENVER CO 80205

Dear RUDY

I am writing to provide you with the testing results of soil samples EPA collected from your property as part of the Vasquez Boulevard and I-70 Superfund Site investigation. EPA collected three soil samples from your yard and tested the levels of arsenic and lead in each sample. The results are reported in parts of arsenic or lead per million parts of soil.

For the property at: 1221 BRUCE RANDOLPH AVE

Arsenic Concentrations

Sample 1: 5.8 U

Sample 2: 5.7 U

Sample 3: 5.8 U

Arsenic Decision Value: 6Lead Concentrations

Sample 1: 100

Sample 2: 140

Sample 3: 100

Lead Decision Value: 113

EPA compares the decision values shown above to the cleanup levels of 70 for arsenic and 400 for lead to determine whether your yard needs to be cleaned up. The decision values for your property are below the cleanup levels; therefore, a cleanup action is not required at your property. This means your property is not considered by EPA to be part of the Vasquez Boulevard / I-70 Superfund Site. If you lease this property, it is very important that you share these results with the tenants.

If you have any questions, please call me at (303)312-6578 or Pat Courtney at (303)312-6631.
Thank you for your cooperation in this study.

Sincerely,

Victor Ketellapper
Project Manager
